EDUCATION

Vellore Institute of Technology, Bhopal (CGPA: 8.85)

Bachelor of Technology in Computer Science

Bharat Mata Sr. Sec. School (CBSE) — 12th: 88%

Senior Secondary Education

Bharat Mata Sr. Sec. School (CBSE) — 10th: 93%

Secondary Education

Bhopal, MP

2022 – Present

Raipur, Chhattisgarh

2021 – 2022

Raipur, Chhattisgarh

2019 – 2020

PROJECTS

HR Analytics: Employee Presence Insights Dashboard

GitHub

Power BI, Power Query, MS Excel, DAX

- Objective: transform multi-sheet attendance (April–June) into actionable Presence Insights for HR capacity planning.
- Data prep: consolidated monthly sheets and applied a dynamic unpivot function in Power Query to convert dates-as-columns into a single Date column and Status values.
- KPI outputs: Present%, WFH%, SL% (example values: Present = 167.45%, WFH = 9.08%, SL = 0.88%).
- Deliverable: interactive PBIX with filters by Month and Day-of-Week, time-series charts for Present/WFH/SL, and an employee-level detail table for HR review.

Spotify & YouTube Music Trend Analysis

GitHub

Python (Pandas), Matplotlib, Seaborn, Jupyter

- Goal: compare platform engagement metrics to surface top artists/tracks and drivers of popularity across Spotify and YouTube.
- Analyses: top-10 artists by YouTube views, top tracks by Spotify streams, and top channels by views; computed like-to-view ratios to rank engagement efficiency.
- Visualizations: distribution by album_type, grouped bar plots for average engagement, and a correlation heatmap between Views/Likes/Comments/Streams.

Data Professional Survey Breakdown (Power BI)

GitHub

Power BI, Power Query, DAX

- Scope: cleaned and visualized survey responses (demographics, salary, language preference, job satisfaction)
- Cleaning: standardized and normalized data using Power Query rules.
- Insights: average salary by country, language preference treemap, work-life balance and salary satisfaction gauged via DAX measures and slicers.

Layoffs Data Analysis

GitHub

SQL, SSMS (SQL Server Management Studio)

- Dataset: layoff events between 2020–2023.
- Analysis: year-over-year layoff counts, top companies and industries affected, and country-level breakdowns.
- Metrics: computed total layoffs per year and percent-of-workforce impacted to highlight severe events.

Lane Detection using OpenCV

GitHub

Python, OpenCV, NumPy

- Built a frame-by-frame lane detection pipeline using grayscale → Gaussian blur → Canny edges.
- Applied a Region-of-Interest mask and Hough Transform to extract line segments, then averaged slope/intercept values to get left/right lanes.

TECHNICAL SKILLS

Programming Languages: Python, SQL, C++

Libraries/Tools: Pandas, NumPy, Matplotlib, Seaborn, OpenCV, Power BI, Power Query, DAX, SSMS

Databases: MySQL

Concepts: Data Cleaning, ETL (Power Query), Data Visualization, EDA, KPI design, DAX measures

ACHIEVEMENTS

- Internal Round Qualifier — Smart India Hackathon (SIH).
- Finlatics — teamLOR, Pluraes: built business-case dashboards using Power BI and Excel.

STRENGTHS

- Strong analytical thinking and aptitude-solving skills (structured problem solving, numerical reasoning).
- Proactive learner, effective communicator, and collaborative team contributor.

EXTRA-CURRICULAR ACTIVITIES

- Anchored and delivered speeches at school and college events.
- Organized and managed events, developing leadership and coordination skills.
